

temporary bonding

Strength When You Need It

Meet tesa® Bond & Detach

With the unique tesa® Bond & Detach technology, the term "permanent bonding" has been redefined!

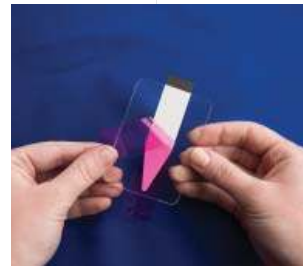

Based on a revolutionary patented technology, tesa tape has developed a product family like no other. Appropriately named "Bond & Detach", this product line offers the robust bonding power of tesa's strongest bonding tapes while also offering the ability to easily remove and reposition the tape and bonded component from virtually any surface. This "repositionable" feature is a direct by-product of the specially-formulated adhesive system which offers maximum flexibility for any temporary or permanent bonding application.

tesa tape has partnered with Marian to offer free samples of tesa® Bond & Detach for suitable applications. Contact Marian directly to request your free sample!
